# THE NEW FACE OF COATING TECHNOLOGIES

Ceramic Pro and its manufacturer NanoShine Ltd are changing the dynamics of the coating industry. NanoShine has for years worked on industrial multi-functional protective coatings for all surfaces and strives to continuously improve the product range.

In 2010 NanoShine Ltd introduced Ceramic Pro - a series of surface protective products for the automotive, marine, aviation, home and heavy industries. Its multifaceted composition shows extraordinarily results on surfaces such as paint, glass, alloy, steel, fabric, leather, plastic and rubber.

Based on ceramic molecular compounds (nanoceramics), its cutting edge technology makes Ceramic Pro stand out as a unique product range in its own category.

The remarkable formula is world patented and it has taken ten years of research and testing to bring the product to where it is today.

All Ceramic Pro products have been tested by SGS, the world's leading inspection, verification and certification entity. Ceramic Pro achieved the highest possible result in each test. All products within the Ceramic Pro range have been also tested and certified as nontoxic.

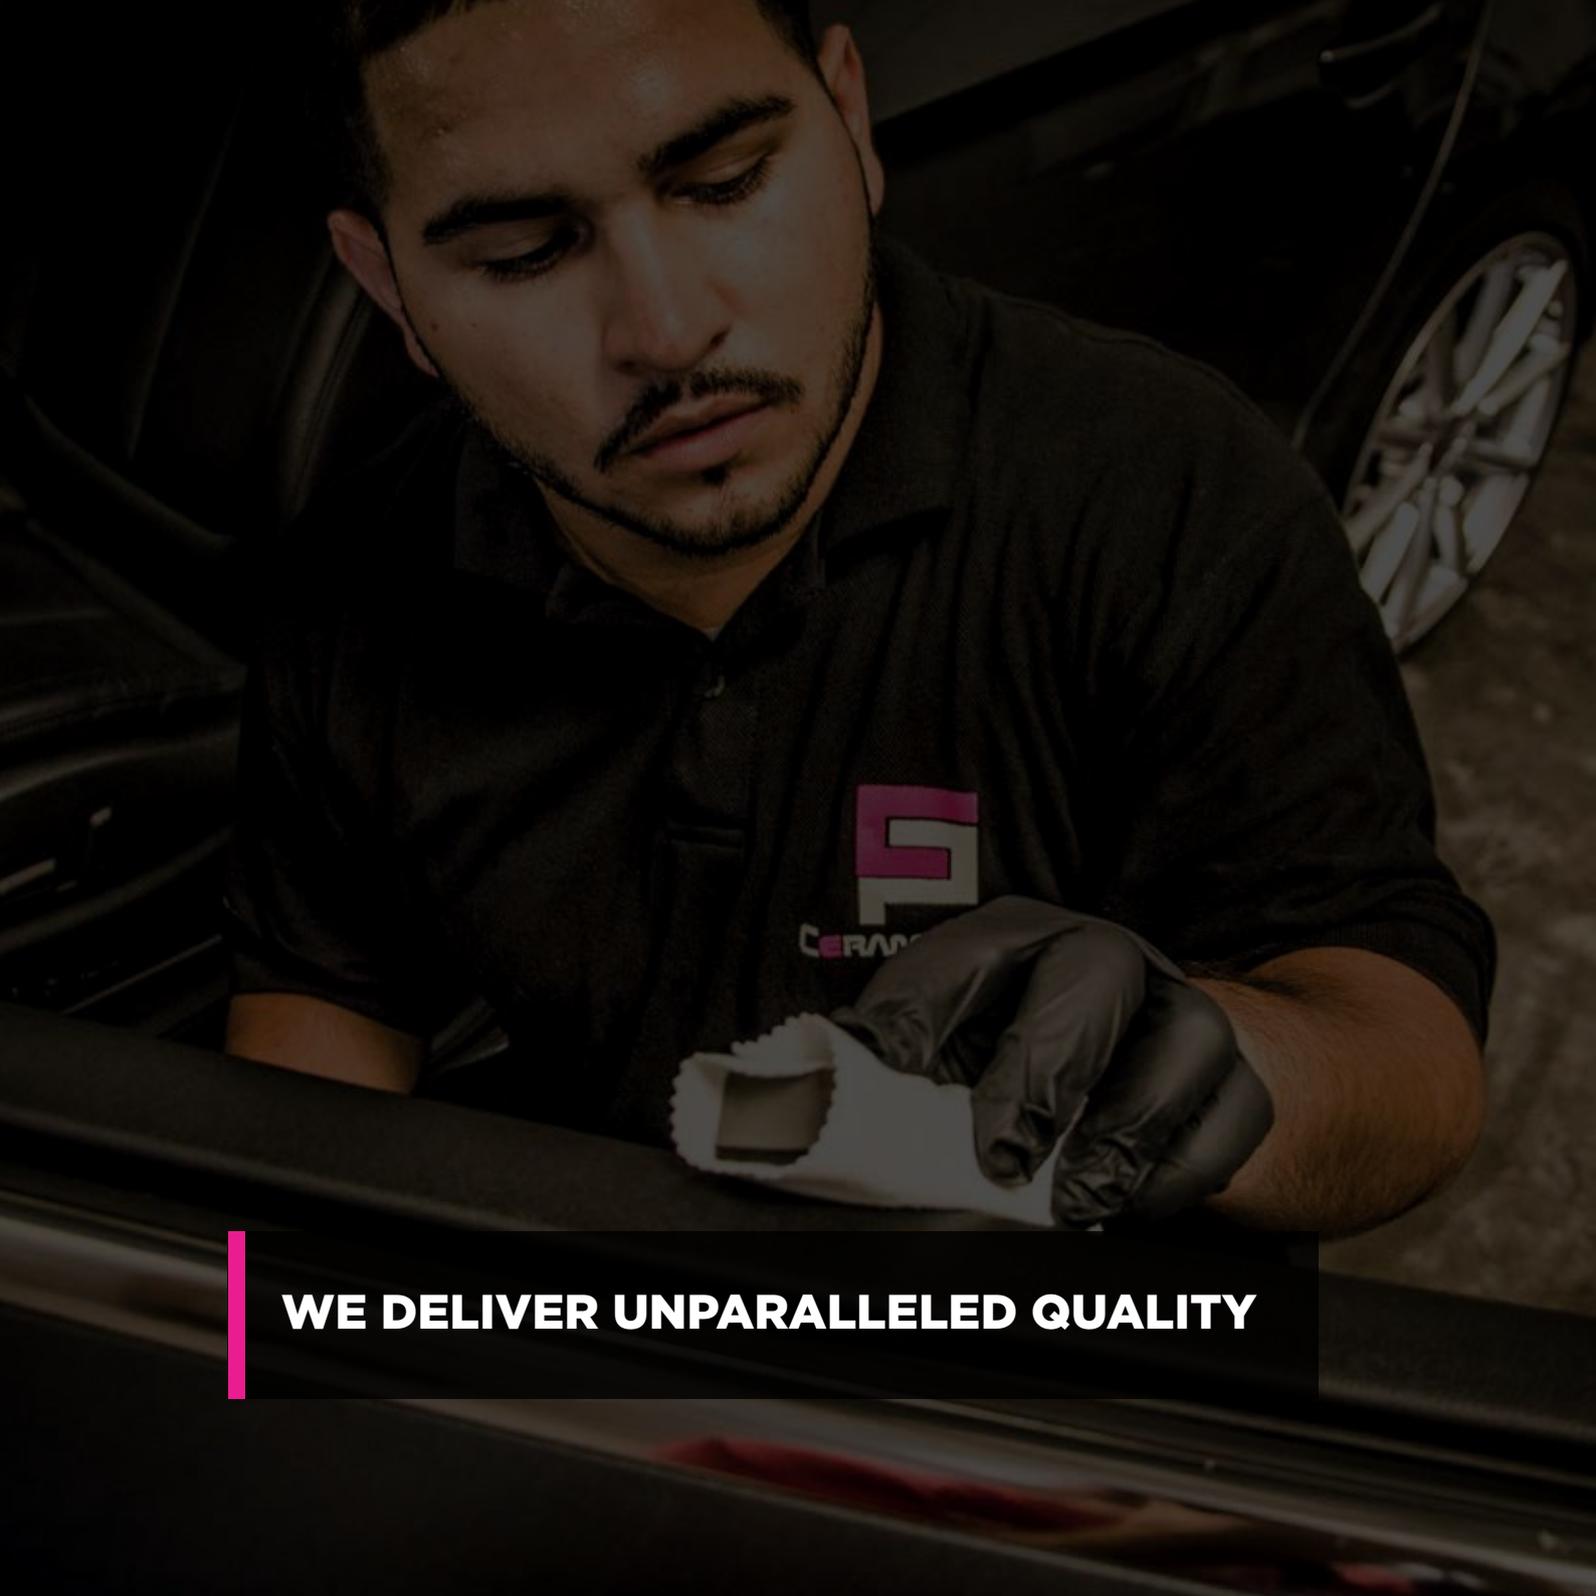

**CUTTING EDGE TECHNOLOGY**

# BUILT ON HIGH-TECH NANOCERAMIC COMPOSITION

The term nanotechnology means working with particles sized from 1 to 100 nanometers; engineering and manufacturing materials on the atomic or molecular level. By building a substance this way from the atom up, specific characteristics such as hardness, lightness, smoothness and heat resistance can be greatly enhanced.

**WE DELIVER UNPARALLELED QUALITY**

# EXPERIENCE THE CERAMIC PRO EFFECT

Ceramic Pro is a clear, liquid nanoceramic coating. When cured, this technology will chemically bond, transforming itself on the surface to become a rigid, super-structure of nanoglass, protecting the substrate it is applied to indefinitely.

The nanoceramic glass coating forms an exceptionally strong and durable shield, resistant to solvents, acids, alkali, UV rays, harsh weather conditions and corrosion. Its durability will keep the surface looking new for many years to come.

The coating is super hydrophobic, any dirt, dust or grime will simply encapsulate on the surface and roll off.

Ceramic Pro starts with a penetrating foundation that builds up to create a protective layer that seals whatever it is applied to, preventing both oxidation and corrosion.

Its UV inhibiting properties will prevent any fading or aging from damaging UV rays on any substrate it is applied to.

Ceramic Pro's extreme hydrophobic effect, makes cleaning easy with no harsh and environmentally harming chemicals required.

Tested and proven to be 9H in hardness, the coating is the strongest and most durable on the market.

The protective glass-shield makes the surface extremely glossy and sleek, preventing bird droppings, tar, dirt, stains etc from bonding.

The hardness of the surface will prevent it from becoming damaged by scuffs and minor scratches.

Unlike similar protective products, Ceramic Pro provides permanent protection that can only be removed through heavy abrasion.

## THE COATINGS

## CERAMIC PRO 9H

When applied, Ceramic Pro 9H forms a permanent bond with the surface that will not wash off or break down. The coating can only be removed through abrasion.

Highly durable, 9H can be applied in multiple layers increasing the thickness of the coating as well as the hardness. The more layers, the better the protection.

**Permanent**

**Self-cleaning**

**Scuff resistant**

**9H**

## CERAMIC PRO STRONG

Ceramic Pro Strong is a permanent multi-functional industrial surface protection solution. Its complex matrix makes it the ideal protection for surfaces exposed to harsh weather, chemicals and damaging contaminants.

The protected substrate can be cleaned numerous times without affecting the coating and will not require regular reapplications. Ceramic Pro Strong is applied as a one compound coating and no mixing with other materials is required.

**Chemical resistant**

**Oxidation & corrosion resistant**

**Permanent protection**

# STRONG

## CERAMIC PRO LIGHT

Ceramic Pro Light is a solution that provides an advanced super hydrophobic effect and additional gloss. It is ideal as a top coat to a 9H application.

**Super hydrophobic**

**Extreme gloss**

**Anti-graffiti**

# LIGHT

# WHEEL & CALIPER

## CERAMIC PRO WHEEL & CALIPER

Specifically designed to withstand the extreme conditions that wheels, rims and calipers are exposed to daily, Wheel & Caliper is permanent after one application.

**9H hardness**

**Easy to clean**

**Permanent**

A close-up, low-angle shot of a metallic surface, possibly a car's body panel, featuring embossed patterns and a dark, textured finish. The lighting is dramatic, highlighting the contours of the metal against a dark background. A pink vertical bar is visible on the left side of the image.

**PRESERVES THE NEW LOOK &  
RESTORES OLD SURFACES**

## CERAMIC PRO TEXTILE

The ultimate protection for all types of fabric and suede surfaces. Ideal for both home and commercial items.

**Repels liquids & dust**

**Minimal aging**

**Extremely durable**

## CERAMIC PRO LEATHER

Superior leather surface protection for furniture, car interiors, bags and shoes.

**UV resistant**

**Minimal fading**

**Easy to clean**

## CERAMIC PRO RAIN

Long lasting with extreme durability, Rain is the ideal coating on clear glass windows, windshields and facades.

**Excellent durability**

**Lasts up to 5 years**

**Always clean glass**

## CERAMIC PRO PLASTIC

Adds sheen to all interior and exterior rubber and plastic details while protecting them from normal wear.

**Super hydrophobic**

**Long lasting**

**Looks new**

## CERAMIC PRO PPF & VINYL

Ceramic Pro PPF & Vinyl is a coating system designed for protection of film and vinyl wrapped surfaces. Adding longevity and color depth to the vinyl, the system consists of a Base Coat and a Top Coat. To achieve the best cosmetic effect and maximum protection, both products should be used. The Ceramic Pro PPF system won the Sema 2017 award for best new product.

**UV resistant**

**Increased color depth**

**Prevents fading**

**BASE COAT**

**TOP COAT**

## CERAMIC PRO SPORT

Ceramic Pro Sport is a standalone coating as well as a premium maintenance solution for Ceramic Pro coated surfaces.

Manufactured specifically to increase the effects of a 9H treated surface, Sport will encapsulate the features of the coating and increase its longevity.

## CERAMIC PRO MARINE LINE

The Ceramic Pro Marine line is suitable for all aspects of the Marine industry. The coatings have been industry proven to protect against harsh weather, highly toxic chemicals, corrosion, oxidation, fouling, staining and more.

# OUR INDUSTRIES

**AUTOMOTIVE**

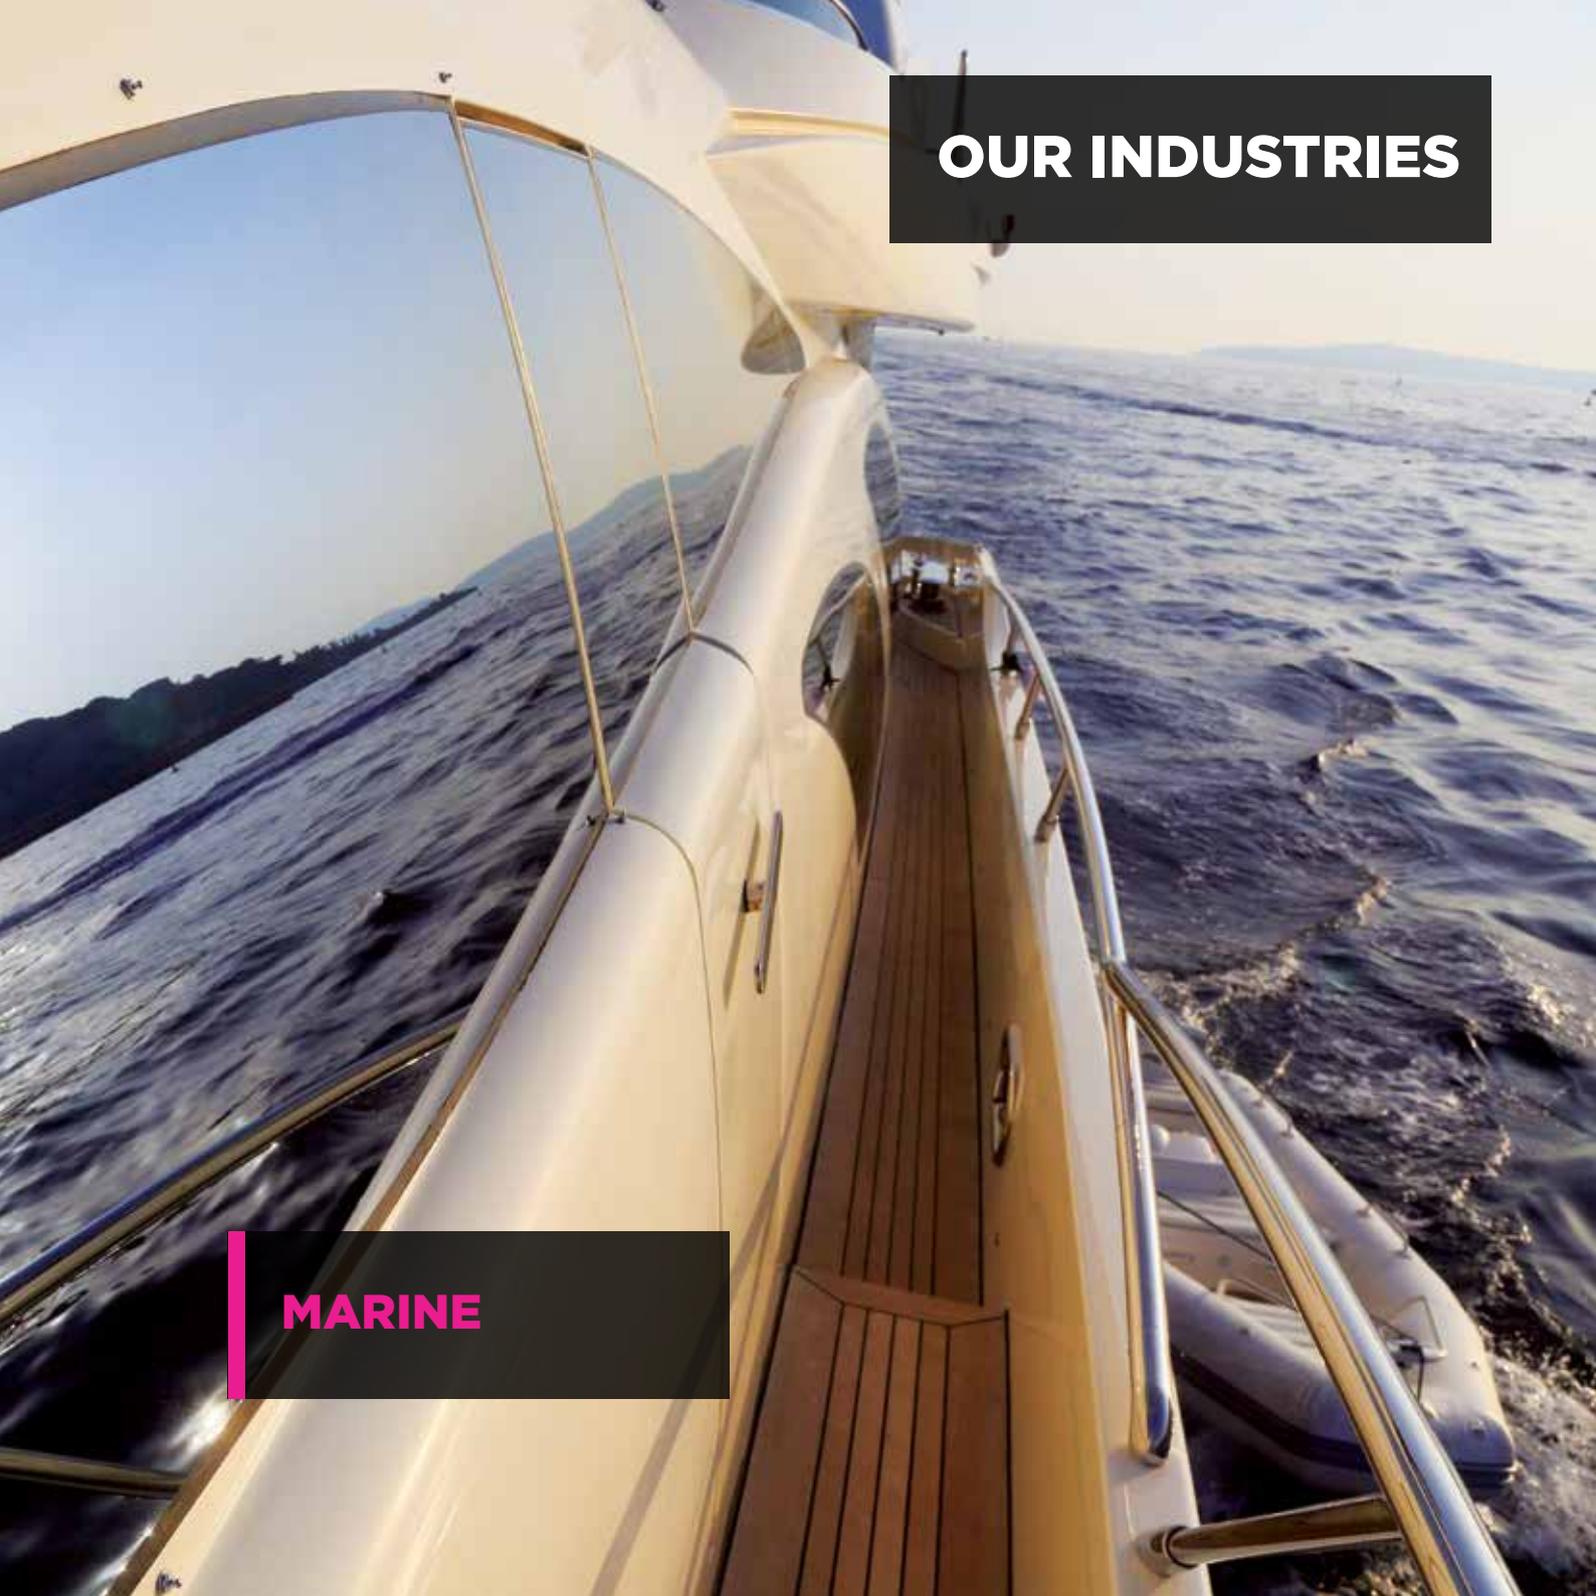

# ALWAYS A NEW CAR

Once Ceramic Pro is applied to your vehicle you will see ultimate gloss and color depth, incomparable to anything else. Properly maintained, the vehicle's finish will shine for many years to come.

The slickness of the coated surface does not allow dirt, brake dust and tar to stick to your car's paint, wheels or glass. The coating is so slick and resistant to chemicals that contaminants can be removed with less aggressive and damaging wash methods. Washing the vehicle becomes less labor intensive and needed less frequently.

Ceramic Pro on your vehicle will permanently protect the exterior and interior from deteriorating over time.

**OUR INDUSTRIES**

**MARINE**

# **MORE ENJOYMENT** **LESS MAINTENANCE**

Ceramic Pro adds qualities to your vessel that will dramatically reduce the required maintenance to keep the boat looking amazing. Acting as a glass shield, nothing will bond to the clear coat or the vinyl. Harsh chemicals are no longer needed to upkeep the boat, a simple wipe down is enough.

Your vessel will no longer be affected or damaged by continuous exposure to harsh weather, UV-rays, salt water, scum and chemicals.

Ceramic Pro will protect your vessel for a life-time after only one application.

A white private jet is parked on a tarmac during sunset. The aircraft's cabin door is open, and its airstair is extended. The scene is bathed in the warm, golden light of the setting sun, with long shadows cast across the pavement. In the background, there are hazy hills and a clear sky.

**OUR INDUSTRIES**

**AVIATION**

# A PROTECTIVE SHIELD

Extreme weather conditions can be very damaging to any surface. Ceramic Pro protects an aircraft from extreme climates and contaminants that it is exposed to daily. With multiple layers and the right maintenance Ceramic Pro will prevent rain erosion, sky drawl and icing. Once applied, it will also reduce drag which in turn saves fuel and increases maximum speed.

Maintenance costs will be reduced dramatically and the investment of coating airplanes with Ceramic Pro is repaid through cost savings.

A large offshore oil rig is silhouetted against a bright, golden sunset sky. The sun is positioned directly behind the central derrick, creating a strong lens flare effect. The rig's complex structure, including cranes and platforms, is clearly visible against the bright background. The ocean surface is visible in the foreground and background, with a small ship visible on the horizon to the right.

**OUR INDUSTRIES**

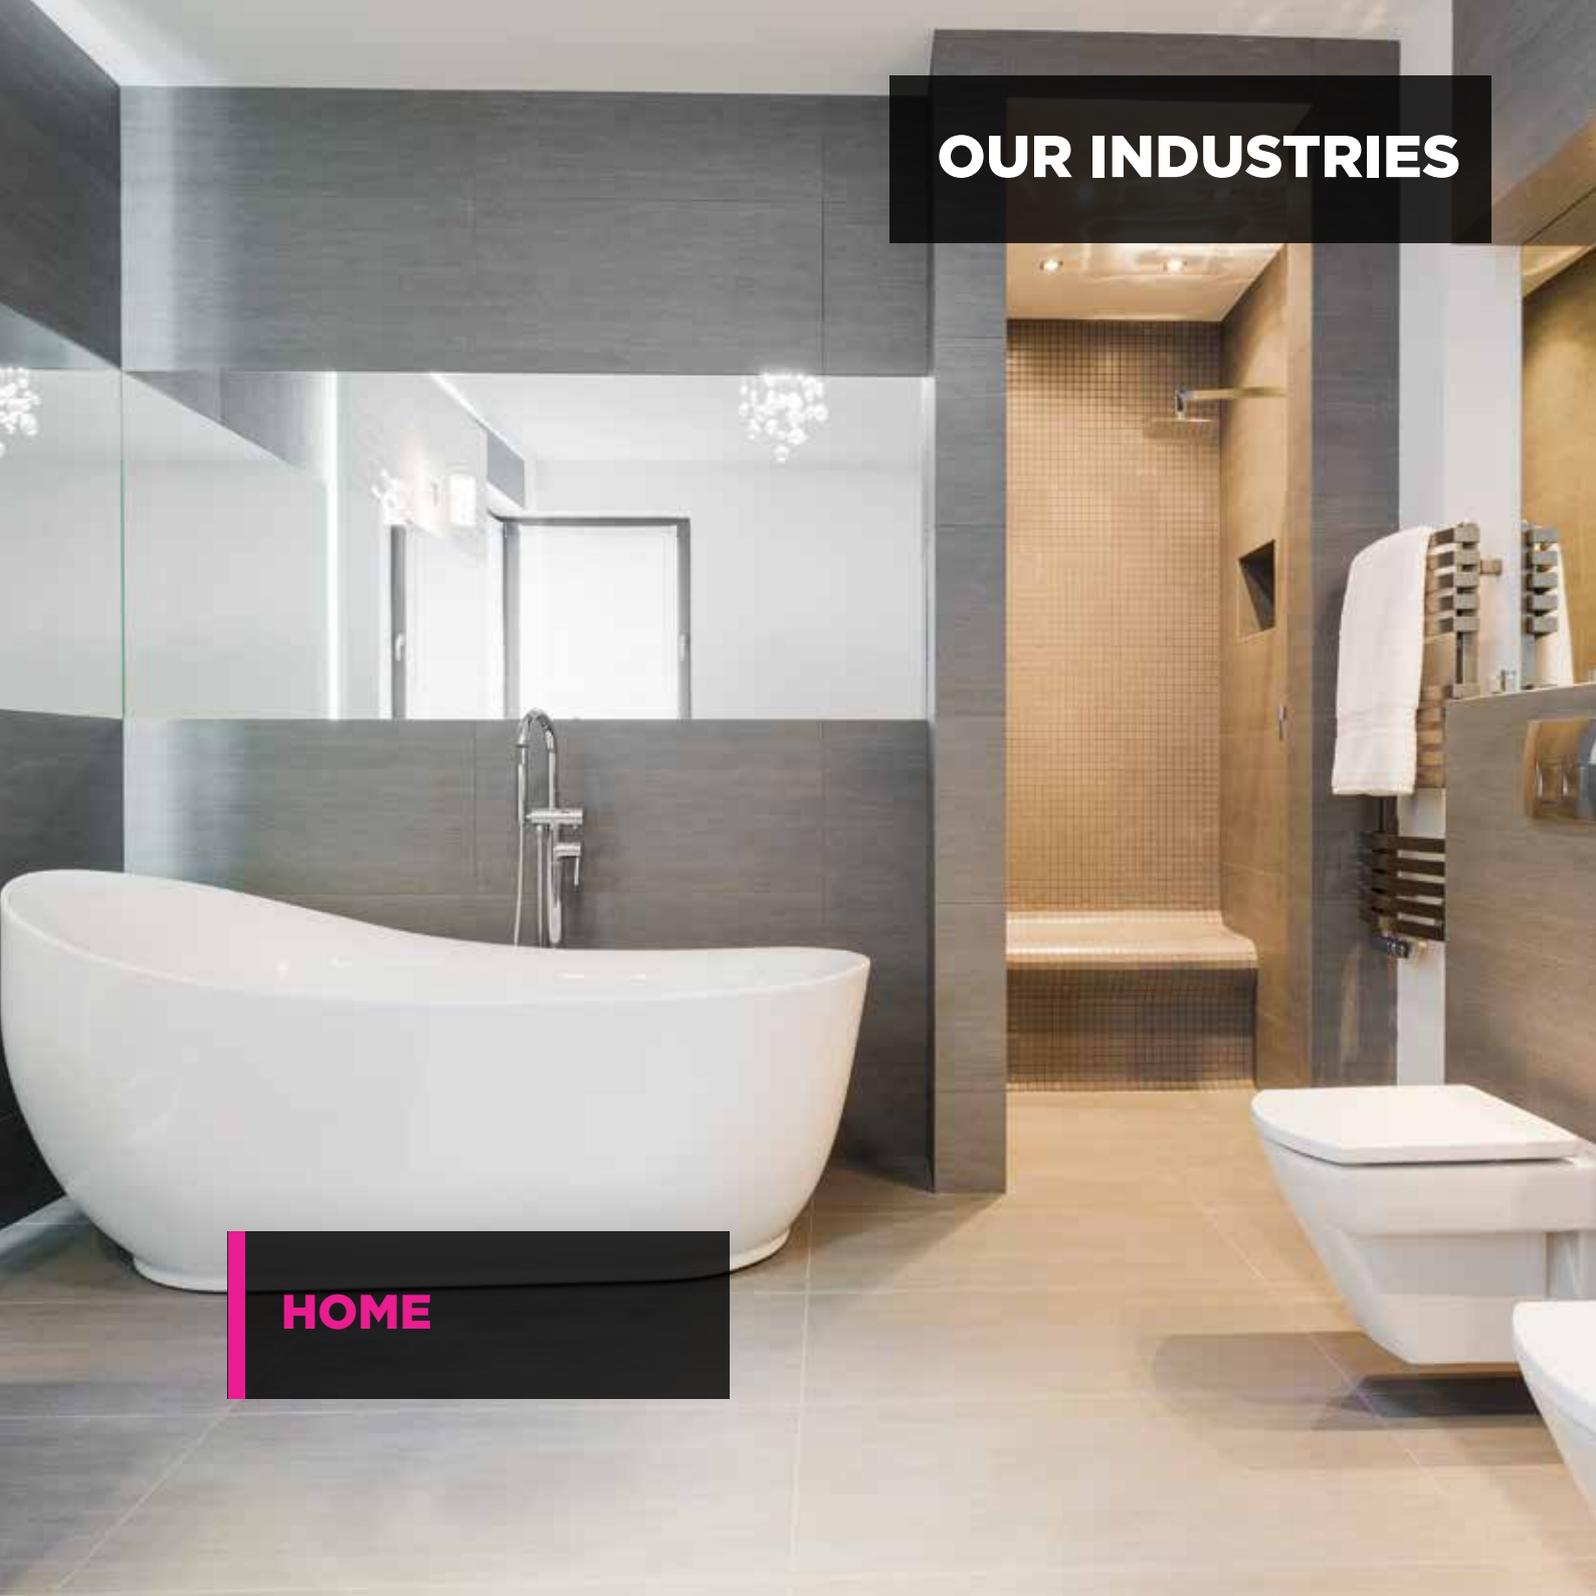

**HEAVY INDUSTRY**

# SMALL INVESTMENT HUGE RETURN

There is a large variety of surfaces within heavy industry where the life of a structure is compromised due to its exposure to erosion, oxidation, corrosion, graffiti, UV-rays etc. Ceramic Pro is applied to pipelines, oil rigs, facades, road signs, public transportation, etc globally and is proven to extend the longevity of these structures.

In addition, the maintenance costs within this industry are often astronomical, and with Ceramic Pro applied, the upkeep process is required less frequently as well as less labor intensive.

**OUR INDUSTRIES**

**HOME**

# LONG LASTING EFFECT

Ceramic Pro offers a long lasting surface protection for your entire home. Most surfaces in a house, commercial buildings or offices are exposed to extensive wear and tear through everyday usage.

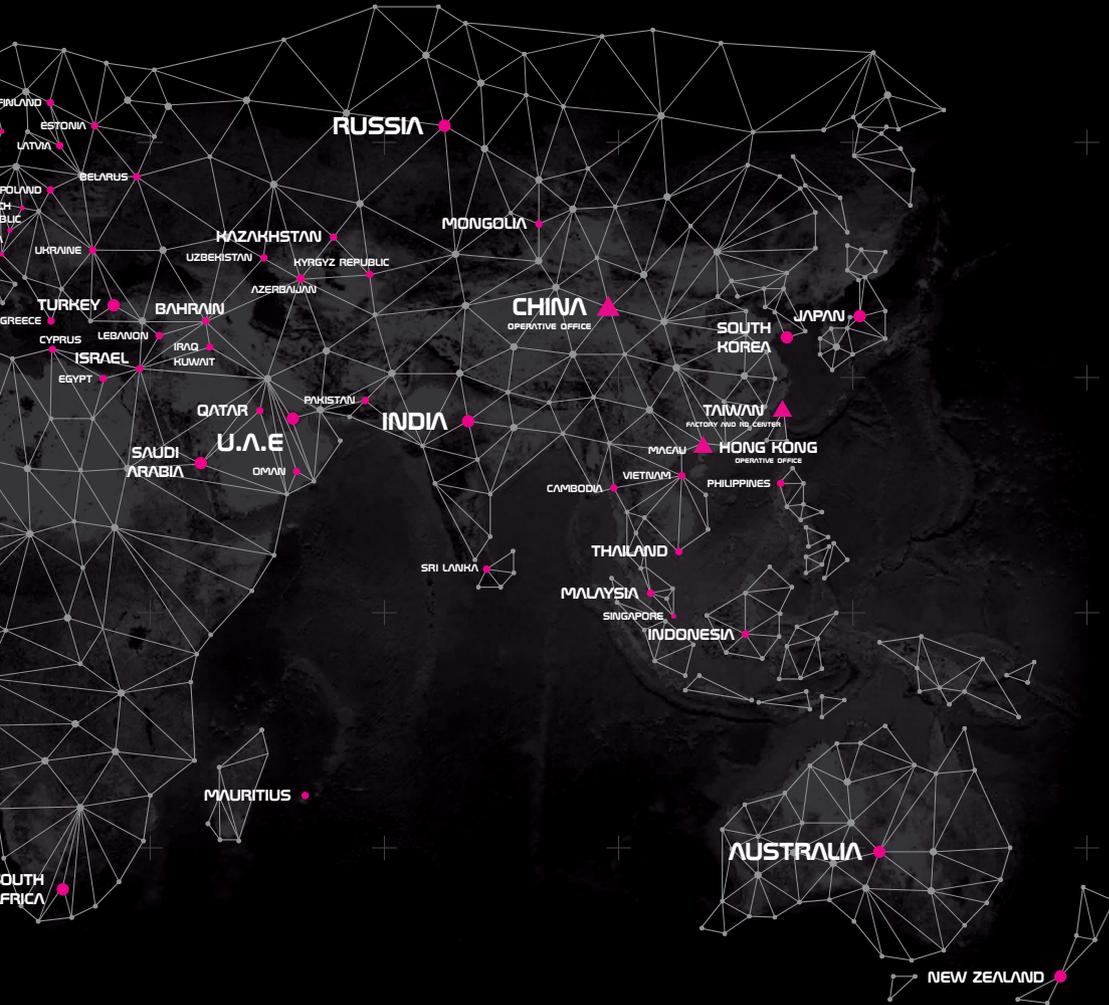

When applied, Ceramic Pro acts as a flexible layer of glass, preventing permanent staining, aging and scuffs from damaging outdoor surfaces, sinks, bathroom tiles and furniture.
