Ceramic Pro Maintenance Program

Ceramic Pro Warranty is provided for the coating based on the tier of package selected.

Please note that specific warranty information and liability clauses can be found on the “After Care Instructions & Warranty” booklet which will be provided to you at the time of pick up once the application is completed. If you would like to know specific information regarding the warranty, please contact your local Ceramic Pro Applicator for assistance.

The Ceramic Pro Maintenance Program includes ‘quarterly’ maintenance washes and re-activations as part of the warranty coverage. The program was introduced to ensure the coating is maintained and care for the vehicle is professionally executed under the supervision of a certified Ceramic Pro Applicator.

Following the Maintenance program will allow you to ensure peak performance of the coating and maintain maximum gloss and self cleaning properties over the longer term. Best practices and Care instructions will also be communicated via the booklet for the client to follow at home between regular washes.

A nominal fee determined by the Applicator will be charged for the maintenance inspection and reactivation which will ensure the coating and the paint work is properly cared for.

INSTANT-HEALING

Kavaca instant-healing PPF is designed to feature instantaneous self-healing properties. This film is ideal for exterior surfaces that see a great deal of exposure.

CERAMIC COATED

Kavaca paint protection film is also ceramic coated to improve visual appearance by adding gloss and a hydrophobic effect to any surface it is installed on.
